

ABANOUB REFAAT IBRAHIM

Junior Frontend Developer | React.js / Next.js Engineer

abanoubref3at18@gmail.com | LinkedIn | Github | +201147280044 | Cairo, Egypt

Computer Science graduate skilled in building responsive, component-driven web applications using React, Next.js, TypeScript, and Tailwind CSS. Proven track record of delivering clean UI architectures in team and internship settings.

EXPERIENCES

Front-end Developer Intern at EFG Holdings - Led development of Cine Sphere, a multi-page OTT platform UI, as the primary contributor during a 3-week frontend internship under senior engineering supervision. - Built reusable, responsive components from scratch using Next.js, Tailwind CSS, and TypeScript following production team standards. - Tech Stack: Next.js, Tailwind CSS, and TypeScript.	Jul 2025 – Jul 2025 The Smart Village
Web Development Committee at TechTalent - Contributed to TechTalent's public-facing event website by independently building the Contact Us page, including all form components and input labels, from scratch using Next.js and TypeScript. - Tech Stack: TypeScript, Tailwind CSS and Next.js.	Nov 2024 – Sep 2025 Remote

PROJECTS

Aethel – Classical Art & Storytelling Mobile Application  - Developed and deployed an independent mobile app that automates device wallpaper rotation with classical art and AI-generated stories. - Packaged and distributed production-ready APKs via GitHub Releases, optimizing image caching for zero UI lag. - Tech Stack: React Native, Expo, GitHub Releases, Groq APIs.	Jun 2026 – Jul 2026
Ironwall - Network Security AI Agent - Integrated ML anomaly detection and attack classification models, with a live PySide6 dashboard featuring real-time packet monitoring. - Architected multi-threaded GUI with Scapy-based packet sniffing, automated firewall mitigation (iptables/netsh), and a dark-themed live traffic table. - Tech Stack: Python, PySide6, Scapy, Scikit-learn, TensorFlow, iptables.	Aug 2025 – Jun 2026
Cine Sphere - OTT Platform with Ocean of Movies/Shows  - Developed a responsive, multi-page Over-The-Top (OTT) platform user interface. - Created a reusable component architecture from scratch, ensuring seamless user navigation and layout consistency. - Tech Stack: Next.js, Tailwind CSS, TypeScript.	Jul 2025 – Jul 2025
Homy - Student Housing Mobile Application  - Led a team to deliver a full-stack mobile app with 4 core tabs (Home, Explore, Search, Profile), cart functionality, and a working admin dashboard. - Implemented end-to-end Firebase integration (Firestore + Auth) for real-time data, user authentication, and role-based admin access. - Tech Stack: React Native, Firebase (Firestore & Auth), AsyncStorage.	Feb 2025 – May 2025

EDUCATION

B.Sc. in Computer Science (Ranked 23rd in the department) Faculty of Science, Cairo University	Sep 2022 – Jun 2026 Giza
--	-----------------------------

SKILLS

Programming Languages: JavaScript | Java | Python | TypeScript | C++ | C | PL/SQL
Web & App Development: Next.js | React.js - Vite | Express.js | Tailwind CSS | Bootstrap | Hibernate | PySide6 | Jetpack Compose | SASS
Database & Tools: MongoDB | MySQL | Oracle XE | Firebase | REST APIs | Node.js | Linux (Ubuntu/Debian)
AI/ML & Tools: Scikit-learn | NumPy | Pytorch | TensorFlow | Pandas | Experta | Git/GitHub | Figma
CS Core: OOP | Data Structures & Algorithms | System Design | Distributed Systems | Operating Systems
Soft Skills: Problem-Solving | Adaptability | Leadership | Communication
Languages: Arabic (Native) | English (C1)
